Ruben Fuguett Gutierrez

07869705590 | ruben.fg07@icloud.com | linkedin.com/in/rubenfg747 | github.com/ruben0161

Education

Imperial College London — South Kensington, London
Electrical and Electronical Engineering MEng | UKESF Semiconductor Award holder — *Sep. 2026 – Jun. 2030*

Chealde Hulme Sixth Form — Stockport, Manchester
*A*AAA – Maths, Physics, Further Maths and Chemistry* — *Sep. 2024 – Jun. 2026*

Experience

Process Engineering Work Experience — Aug. 2025
Worley Limited — *Stockport, Manchester*

- Use of CAD software - Fusion 360
- Collaborated with a team to design a Heat Exchanger
- Presented the product to a panel of 30 experts

Private Tutoring — Jan. 2026 – Present
Freelance and Mathnasium — *Bramhall, Manchester*

- Personal Tutoring for 5 Students in GCSE and A level
- Subjects include Math, Science and English
- Tutoring primary school and highschool students at Mathnasium UK

Projects

BPhO Coding Challenge | *Python, Matplotlib* — Jun. 2025 – Aug. 2025

- Completed 10 Challenges in Python related to optics
- Recorded a 3 minute summary of my code and posted it to YouTube
- Achieved Silver Prize

8-Bit Binary Multiplier | *Logisim* — Jul. 2025 – Aug. 2025

- Initially built Binary Adder and Flip Flop logic circuits
- Expanded to a binary multiplier with 300+ Logic gates
- Manually built to gain appreciation for IC complexity

8x8 LED Matrix | *Arduino IDE, C* — Aug. 2025 – Sep. 2025

- Programmed onto an 8x8 matrix to display images
- Used schematic analysis to route the anodes and cathodes of the component
- Coded through Arduino IDE using for loops and matrices to write to the LED Matrix

School Ted Talk | *Electromagnetism, Group Theory* — Apr. 2026

- Presented a talk to 40+ peers and teachers
- Titled 'The Power of Symmetry'
- Using Local U(1) Symmetry to show how electromagnetism can be derived using a Gauge Field

Skills

Languages: Fluent in English and Spanish, learning Mandarin - HSK1
Programming: C, C++, Python, SystemVerilog
Software: AutoCAD, Auotdesk Fusion 360, Issie, KiCad, Logisim
Electronics: Arduino IDE, Breadboard, Raspberry Pi, Soldering
Essays: Wrote personal essays titled *'Microchip Manufacturing'* and *'From The Big Bang to life as we know it'*
Hobbies: 1 Year of Piano - Self Taught. Speedcubing - 3x3 PB of 14.32 s
Awards: MT Senior Maths Challenge - 2x Gold, British Physics Olympiad - Gold, British Chemistry Olympiad - Silver
